FOR IMMEDIATE RELEASE

RCG expands international management consulting services with recruitment of Emilie Reeve in London office

London, England – October 4, 2017 - The Renewables Consulting Group (RCG) announced today the continued expansion of its team with the addition of Emilie Reeve to the firm's London office as an Associate Director. Ms Reeve brings with her a wealth of experience in managing R&D projects as well as having a deep understanding of new international renewable energy markets.

Prior to joining RCG, Ms Reeve spent seven years as part of the Carbon Trust's Offshore Wind team where she was responsible for managing the Offshore Renewable Joint Industry Programme (ORJIP) -- a collaborative R&D programme involving several developers and public bodies funding research to better understand the impacts of offshore wind on the environment. In addition to this role she also led the Carbon Trust's international offshore wind activity, working with governments and businesses to accelerate the development of offshore wind in US, Taiwan and Japan.

"I am very pleased to welcome Emilie to our growing team in London. Emilie has a huge amount of consulting and R&D experience, across a broad range of highly relevant topics in offshore wind and particularly in the developing Asia markets. Emilie will be a key asset in assisting our clients with go to market analysis, concession bid strategy, due diligence, road mapping, market design, and collaborative R&D programmes." –Gareth Lewis, Managing Director and Head of New Markets.

Ms Reeve has also managed numerous R&D projects as part of the Carbon Trust's Offshore Wind Accelerator and was responsible for managing the Cable Installation working group as well as overseeing the delivery of various other projects spanning, foundations, electrical and access systems, all aimed at reducing the risk and cost of offshore wind. Ms Reeve also has experience working directly with wave and tidal energy designers to commercialise their technology, as an integral part of the set up and delivery of the Marine Renewables Commercialisation Fund. Prior to The Carbon Trust, Ms Reeve worked as a management consultant and senior research executive.

"I am delighted to be joining such a forward thinking and energetic team. RCG has gained a reputation for delivering exceptional quality over an extensive range of services and I am looking forward to working with the team and supporting the company in growing internationally." – Emilie Reeve

Ms Reeve has a MSc. Marine Ecology and Environmental Management from Queen Mary University London, and a BSc. Marine Biology from University of Aberdeen. She is also a Certified Expert in Climate and Renewable Energy Finance via The Frankfurt School of Finance and Management.
