FOR IMMEDIATE RELEASE

RCG named as a consulting firm that outperforms the profession

London, United Kingdom – Monday, 6th March 2019 – The Renewables Consulting Group (“RCG”) is delighted and honoured to have been selected as one of *Consulting*® magazine's “Seven Small Jewels”, an annual feature highlighting smaller consulting firms that are shaking up the industry.

Consulting® magazine, which is the flagship publication of the consulting profession, said that the firms awarded as one of the Seven Small Jewels were breaking new ground in terms of firm management and overall financial performance. They note that year in and year out, the Seven Small Jewels far outperform the overall profession.

“The vision for the business was, and remains to focus on building the most respected advisory firm dedicated exclusively to the high-growth global renewable energy sector, offering both management consulting with technical advisory services. We always believed that there was a real opportunity to build a specialized firm that could bring together top-tier strategy and intelligence services with technical advisory, serving both established and emerging markets. The whole team is proud to be recognised by Consulting® magazine as a stand out consulting firm.” – Sebastian Chivers, CEO, RCG.

The Seven Small Jewels feature can be found in the February 2019 edition of the magazine and at *Consulting*® magazine's website: <http://www.consultingmag.com>
