FOR IMMEDIATE RELEASE

RCG taps offshore wind expert de Mas in support of developing market

Barcelona, Spain – 5th January 2021 - The Renewables Consulting Group (RCG), a sector specialist advisory firm, today announced the appointment of offshore wind expert Carolina de Mas as a Principal in our Barcelona office.

The Mediterranean offshore wind energy market shows great potential and RCG has responded by bolstering both its talent and technical advisory services in this area.

With more than a decade's worth of experience in the offshore energy sector, de Mas will provide clients with expert technical support for the development and delivery of renewable energy projects.

She joins RCG from Ørsted and has held multiple roles in both technical and management positions for major European energy developers and operators. De Mas has led technical teams for some of the world's largest offshore wind farms, with a special focus on identifying initiatives to reduce levelised cost of energy (LCoE).

Commenting on the appointment, Andrew Cole, Managing Director – Europe, Middle East & Africa, said:

“Carolina has a proven track record in managing technical multi-disciplinary teams to deliver competitive bids for offshore wind tenders. She is an expert in the offshore arena and has a deep understanding of the full project lifecycle - having worked across the development, construction and operational stages.” – Andrew Cole, Managing Director

RCG is leading the development of offshore wind globally. Our expertise covers the full offshore wind value chain, from development, through construction, to asset management and decommissioning. We think of offshore wind as power at scale - technology with the potential to deliver a global energy transition.
